M1 with optional fitted wings/sides

Fully integrated video scaling and mixing for everyday

A complete solution, simply connect M1 to any display and start presenting. Front panel console style controls together touch screen display make M1 intuitive and natural in use, even for the new operator.

More than just a video mixer, M1 allows full scaled output to modern displays without to additional equipment. For stage/conference presentations on board features including PIP (picture-in-picture) add powerful capabilities to make use of additional video sources including cameras;

While compact in size, M1 brings together essential features for small presentation environments, including audio mix features allowing connection to audio mixers or powered speakers.

Features

- · Four modular user fit inputs
- · Single channel output on HDMI (optionally SDI)
- · Resolution independent configurable output
- · Dedicated Multi-View Preview
- Picture in Picture with DSK & Mask effects
- Digital video transition effects
- · Pixel-to-pixel scaling engine
- · Digital stereo audio processing
- · Support for external audio insert and output
- · Genlock Y In
- · Remote control via XPOSE mobile app.

Dedicated Preview

A dedicated HDMI output with multi-view is provided from which both PGM and PST can be monitored, along with input sources and audio levels.

Picture-in-Picture

Add a PIP as a foreground layer in any position, including with scale and crop.

Transition Effects

There are over a dozen transition effects and wipes built into M1. These maybe used via the T-bar or timed from the TAKE button.

Mixed Audio

Both embedded and insert audio are supported with separate left/right audio level controls available on the front panel. Audio may be selected independently from the video source. PPM monitoring maybe shown on the PVW as visual confirmation of source and output.

Digital Effects

The PIP may have an effect applied - options include masks (with a range built in as well as support for custom masks), DSK/Chroma Key to remove a background colour and variable edge blend, as soften effect to allowing the PIP to merged with the main image.

Scale

Set output resolution independently from input resolutions, and scale the output pixel-to-pixel, ideal for direct connection to non-native displays such as LED.

Visual Enhancements

Apply a range of visual effects and enhancements with fine grain controls may be utilised for each input. Controls include brightness, contrast, saturation, sharpness and color temperature.

*shown with optional input and output modules – refer specification and options

Video Mixing

M1 vision mixer style control panel provides a range of tactile controls including familiar T-Bar and large illuminated buttons for easy of operation.

Modular by Design

Each input is individual and are user fit – choose from a wide range of modular signal options. Modules are highly standardised across the RGBlink range for event greater flexibility.

Input options include HDMI, DVI, SDI, CVBS, USB and more.

Output options are HDMI or HDMI|SDI.
